**SUMMARY:** 5+ years of experience as a software engineer in all phases of software development lifecycle. Subject matter expert for solutions developed. Mentored and delegated tasks to new full-time and part-time recruits

## EDUCATION

<b>M.S., Software Engineering</b>	<b>San Jose State University</b> , San Jose, CA	Aug 2019 - Expected Dec 2020
<b>Courses:</b> Software Systems, Enterprise Software, Web Development, Database Systems, Cloud Computing, Virtualization, Data Mining		
<b>B.Tech., Computer Science</b>	<b>University of Calicut</b> , India	Jul 2010 - May 2014

## EXPERIENCE

<b>LyveBee</b>	<b>Jun 2020 – Present</b>
Engineering Intern	San Jose, CA
<ul style="list-style-type: none"><li>LyveBee (<a href="https://www.lyvebee.com/">https://www.lyvebee.com/</a>) is a startup marketplace that connects users with instructors for online learning</li><li>Designed and implemented a <b>video conferencing solution</b> using <b>Google Meet</b> in <b>Node.js</b>, after evaluating and doing proof of concept for several alternatives, where 100% of the application's online classes happen</li><li>Researched and designed a scalable and configurable <b>search solution</b> using <b>App Search</b>, an <b>Elasticsearch</b> product that reduced search time by over 80%</li></ul>	
<b>Oracle</b>	<b>Jun 2014 - Jun 2019</b>
Senior Applications Engineer	Trivandrum, India
<ul style="list-style-type: none"><li>Developed a web application for enterprise sales catalog management using <b>HTML</b>, <b>CSS</b>, and <b>JavaScript</b> and implemented backend <b>REST API</b> in <b>Node.js</b> in compliance with TMS Forum API schemas providing an end to end CX</li><li>Designed and developed a backend solution in <b>Node.js</b> to integrate data between <b>CRM</b>, <b>quoting and commerce</b> cloud applications enabling consumers to deploy, manage and publish product catalog repository to various applications</li><li>Built utilities in <b>Java</b> and <b>Python</b> to automate processes and reduce manual efforts by over 90%</li><li>Implemented solutions for real time <b>data synchronization</b> between <b>CRM</b> applications, that increased sales of new contracts and renewal of expiring contracts</li><li>Developed a solution in <b>Java</b> for <b>data migration</b> in bulk between <b>CRM</b> applications that automated 80% of tasks</li></ul>	

## SKILLS

**Languages:** Java, SQL

**Back End Technologies:** Node.js, Express.js, Siebel Tools, REST, SOAP, XML, JSON, Design Patterns

**Front End Technologies:** HTML5, CSS3, JavaScript, Familiar with React

**Others:** GIT, AWS, Jira, Agile and Scrum methodologies, SDLC, Linux, Windows, Elasticsearch, UML

**Databases:** SQL: MySQL, Oracle DB, NoSQL: MongoDB

**Oracle Applications and Tools:** CRM Systems, OSC, Siebel, CPQ, OCC, AppComposer, Groovy Scripting, OIC/ICS, AIA, MCS, VBCS

## PROJECTS

<https://github.com/parvathysjsu> for additional information and projects

### Heads or Tails: NPM Package for Coin Flipping

- Developed and published an NPM package @plokidesigns/heads-or-tails in Node.js which simulates flipping a coin and returns heads or tails. It is a public package that has over 200 weekly downloads

### Product Inventory App

- Built a single page application for product inventory and management using MERN stack. Elasticsearch is implemented using mongoosastic library in Node.js for searching the repository across all objects, enabling faster search and eliminating complex queries to the database

### FoodStrap: Food Donation Portal

- Developed a web application in Node.js using Express.js, HTML, CSS, and MongoDB for leftover food donation and to eliminate food waste. An open source chat application is integrated with this app. Sentiment analysis is performed on chat messages in Node.js. Automated test cases using Mocha and Selenium in Node.js

### HomeShare: An Airbnb Prototype

- Implemented a web application for renting rooms. Performed database design, developed queries and stored procedures in MySQL. Build backend REST APIs using Node.js
